Journal of Analytical and Applied Pyrolysis, 24 (1993) 345–346
Elsevier Science Publishers B.V., Amsterdam

Author index

Arauzo, J., see Bilbao, R., 257
Audisio, G.
–, and Bertini, F.
Molecular weight and pyrolysis products distribution of polymers. I. Polystyrene, 61

Baldo, L., see Lapolla, A., 87
Bergman, H., see Östmark, H., 163
Bertini, F., see Audisio, G., 61
Bilbao, R.
–, Salvador, M.L., Garcia, P., and Arauzo, J.
Solid weight loss in the thermal decomposition of cellulose and pine sawdust, 257
Bradna, P.
–, and Zima, J.
Compositional analysis of epoxy matrices of carbon fibre composites by pyrolysis–gas chromatography/mass spectrometry, 75

Carlsen, L., see Christiansen, J.V., 311
Cassoux, P., see Laurent, F., 39
Chiavari, G.
–, and Galletti, G.C.
Pyrolysis–gas chromatography/mass spectrometry of amino acids, 123
Chiavari, G.
–, Galletti, G.C., Lanterna, G., and Mazzeo, R.
The potential of pyrolysis–gas chromatography/mass spectrometry in the recognition of ancient painting media, 227
Choukroun, R., see Laurent, F., 39
Christiansen, J.V.
–, Feldthus, A., Egsgaard, H., and Carlsen, L.
Flash pyrolysis of coal sub-structures adsorbed on a carbosieve, 311
Coste, M., see Lede, J., 179
Creek, K.E., see Sahota, R.S., 107
Crepaldi, G., see Lapolla, A., 87
Curcuruto, O., see Lapolla, A., 87

DeLuca, S.J., see Voorhees, K.J., 1
DeLuca, S.J.
–, and Voorhees, K.J.
A comparison of products from an air atmosphere tube furnace with a vacuum Curie-point pyrolyzer: implications for biodetection, 211
Dentzer, J., see Ehrburger, P., 333
Dziedzinl, P., see Ehrburger, P. 333

Egsgaard, H., see Christiansen, J.V., 311
Ehrburger, P.
–, Dentzer, J., and Dziedzinl, P.
Pyrolysis of impregnated carbon adsorbents after exposure to cyanide gases, 333
Ekvall, K., see Östmark, H., 163

Favretto, D., see Lapolla, A., 87
Fedele, D., see Lapolla, A., 87
Feldthus, A., see Christiansen, J.V., 311
Feurer, R., see Simon, J., 51

Galletti, G.C., see Chiavari, G., 123
Galletti, G.C.
–, Ward, R.S., Pelter, A., and Goubet, D.
Generation of isobenzofuran derivatives by pyrolysis–gas chromatography/mass spectrometry, 139
Galletti, G.C., see Chiavari, G., 227
Galletti, G.C., see Reeves, III, J.B., 243
Garcia, P., see Bilbao, R., 257
Gerhardinger, C., see Lapolla, A., 87
Goubet, D., see Galletti, G.C., 139
Gu, P.
–, Hessley, R.K., and Pan, W.P.
Thermal characterization analysis of milkweed floss, 147

Hessley, R.K., see Gu, P., 147
Hirata, F., see Shimasaki, C., 291

Ishiwatari, M.
–, Sakashita, H., Tatsumi, T., and Tominaga, H.
Thermal decomposition behavior of oil shale kerogens observed by stepwise pyrolysis–gas chromatography, 273

Jelink, T., see Venema, A., 191

Lanterna, G., see Chiavari, G., 227
Lapolla, A.
–, Gerhardinger, C., Baldo, L., Crepaldi, G., Fedele, D., Favretto, D., Seraglia, R., Curcuruto, O., and Traldi, P.
Pyrolysis–gas chromatography/mass spectrometry in the characterization of glycated albumin, 87

Laurent, F.
–, Zhao, J.S., Valade, L., Choukroun, R., and Cassoux, P.
Thermoanalytic studies of the pyrolysis of $CpTiCl_2N(SiMe_3)_2$ and its use as a precursor for the chemical vapor deposition of titanium carbonitride, 39
Lédé, J.
–, Mercadier, J., Coste, M., and Villermaux, J.
Kinetics of triphenylisocyanurate pyrolysis, 179

Mazzeo, R., see Chiavari, G., 227
Mercadier, J., see Lede, J., 179
Morancho, R., see Simon, J., 51
Morgan, S.L., see Sahota, R.S., 107

Navale, V.
The indexing of monoglycerol diether lipids by flash pyrolysis–gas chromatography, 301
Noguerola, A., see Voorhees, K.J., 1

Ohta, H., see Shimasaki, C., 291
Östmark, H.
–, Bergman, H., and Ekvall, K.
Laser pyrolysis of explosives combined with mass spectral studies of the ignition zone, 163

Pan, W.P., see Gu, P., 147
Pelter, A., see Galletti, G.C., 139
Pola, J., see Urbanová, M., 325

Reeves, III, J.B.
–, and Galletti, G.C.
Use of pyrolysis–gas chromatography/mass spectrometry in the study of lignin assays, 243
Reynes, A., see Simon, J., 51

Sahota, R.S.
–, Morgan, S.L., and Creek, K.E.
A pyrolysis–gas chromatographic/mass spectrometric method for measuring the DNA content of cultured mammalian cells, 107
Sakashita, H., see Ishiwatari, M., 273
Salvador, M.L., see Bilbao, R., 257
Seraglia, R., see Lapolla, A., 87
Shimasaki, C.
–, Hirata, F., Ohta, H., Tsukurimichi, E., and Yoshimura, T.
Thermal behavior and mass spectrometry studies of 2-oxazolidinone derivatives, 291
Simon, J.
–, Feurer, R., Reynes, A., and Morancho, R.
Thermal dissociation of disilane: quadrupole mass spectrometry investigation, 51
Smith, P.B.
–, and Snyder, A.P.
Characterization of bacteria by oxidative and non-oxidative pyrolysis–gas chromatography/ion trap mass spectrometry, 199
Smith, P.B.
–, and Snyder, A.P.
Characterization of bacteria by quartz tube pyrolysis–gas chromatography/ion trap mass spectrometry, 23
Snyder, A.P., see Smith, P.B., 23
Snyder, A.P., see Smith, P.B., 199

Tatsumi, T., see Ishiwatari, M., 273
Tominaga, H., see Ishiwatari, M., 273
Traldi, P., see Lapolla, A., 87
Tsukurimichi, E., see Shimasaki, C., 291

Urbanová, M.
–, and Pola, J.
Chemical vapor deposition of polycarbosilane by laser-induced decomposition of silacyclohexane, 325

Valade, L., see Laurent, F., 39
Valcarce, R.
Software review: UNSCRAMBLER II-EX, Version 3.42*, 197
Venema, A.
–, and Jelink, T.
A simple method for the introduction of low molecular weight reference compounds for the determination of retention indices or retention time comparison in Curie-point pyrolysis studies, 191
Villermaux, J., see Lédé, J., 179
Voorhees, K.J.
–, DeLuca, S.J., and Noguerola, A.
Identification of chemical biomarker compounds in bacteria and other biomaterials by pyrolysis–tandem mass spectrometry, 1
Voorhees, K.J., see DeLuca, S.J., 211

Ward, R.S., see Galletti, G.C., 139

Yoshimura, T., see Shimasaki, C., 291

Zhao, J.S., see Laurent, F., 39
Zima, J., see Bradna, P., 75

Journal of Analytical and Applied Pyrolysis, 24 (1993) 347–350
Elsevier Science Publishers B.V., Amsterdam

Subject index

N-Acetylglucosamine
A pyrolysis–gas chromatographic/mass spectrometric method for measuring the DNA content of cultured mammalian cells, 107
Advanced glycation products (AGE)
Pyrolysis–gas chromatography/mass spectrometry in the characterization of glycated albumin, 87
Air atmosphere tube
A comparison of products from an air atmosphere tube furnace with vacuum Curie-point pyrolyzer: implications for biodetection, 211
α-Amino acids
Pyrolysis–gas chromatography/mass spectrometry of amino acids, 123
Analysis
Compositional analysis of epoxy matrices of carbon fibre composites by pyrolysis–gas chromatography/mass spectrometry, 75
Ancient painting media
The potential of pyrolysis–gas chromatography/mass spectrometry in the recognition of ancient painting media, 227
Average zip length
Molecular weight and pyrolysis products distribution of polymers. I. Polystyrene, 61

Bacteria
Characterization of bacteria by oxidative and non-oxidative pyrolysis–gas chromatography/ion trap mass spectrometry, 199
Characterization of bacteria by quartz tube pyrolysis–gas chromatography/ion trap mass spectrometry, 23
Identification of chemical biomarker compounds in bacteria and other biomaterials by pyrolysis–tandem mass spectrometry, 1
Biodetection
A comparison of products from an air atmosphere tube furnace with a vacuum Curie-point pyrolyzer: implications for biodetection, 211
Biomarker compounds
Identification of chemical biomarker compounds in bacteria and other biomaterials by pyrolysis–tandem mass spectrometry, 1

Carbon-fibre composite
Compositional analysis of epoxy matrices of carbon fibre composites by pyrolysis–gas chromatography/mass spectrometry, 75
Carbosieve
Flash pyrolysis of coal sub-structures adsorbed on a carbosieve, 311
Cellulose
Solid weight loss in the thermal decomposition of cellulose and pine sawdust, 257
Thermal characterization analysis of milkweed floss, 147
Charcoals
Pyrolysis of impregnated carbon adsorbents after exposure to cyanide gases, 333
Chemical vapor deposition
Chemical vapor deposition of polycarbosilane by laser-induced decomposition of silacyclohexane, 325
Thermoanalytic studies of the pyrolysis of $CpTiCl_2N(SiMe_3)_2$ and its use as a precursor for the chemical vapor deposition of titanium carbonitride, 39
Coal
Flash pyrolysis of coal sub-structures adsorbed on a carbosieve, 311
$CpTiCl_2N(SiMe_3)_2$
Thermoanalytic studies of the pyrolysis of $CpTiCl_2N(SiMe_3)_2$ and its use as a precursor for the chemical vapor deposition of titanium carbonitride, 39
Cu–Cr compounds
Pyrolysis of impregnated carbon adsorbents after exposure to cyanide gases, 333
CVD
Thermoanalytic studies of the pyrolysis of $CpTiCl_2N(SiMe_3)_2$ and its use as a precursor for the chemical vapor deposition of titanium carbonitride, 39
Cyanide gases
Pyrolysis of impregnated carbon adsorbents after exposure to cyanide gases, 333
Cyclisation
Generation of isobenzofuran derivatives by pyrolysis–gas chromatography/mass spectrometry, 139
Cycloaddition
Generation of isobenzofuran derivatives by pyrolysis–gas chromatography/mass spectrometry, 139

Disilane
Thermal dissociation of disilane: quadrupole mass spectrometry investigation, 51

DNA
A pyrolysis–gas chromatographic/mass spectrometric method for measuring the DNA content of cultured mammalian cells, 107

Epoxy resin
Compositional analysis of epoxy matrices of carbon fibre composites by pyrolysis–gas chromatography/mass spectrometry, 75
Explosives
Laser pyrolysis of explosives combined with mass spectral studies of the ignition zone, 163

Fibre
Use of pyrolysis–gas chromatography/mass spectrometry in the study of lignin assays, 243
Flash pyrolysis
Flash pyrolysis of coal sub-structures adsorbed on a carbosieve, 311
Flash pyrolysis–gas chromatography
The indexing of monoglycerol diether lipids by flash pyrolysis–gas chromatography, 301
Forages
Use of pyrolysis–gas chromatography/mass spectrometry in the study of lignin assays, 243

Gas chromatography
A simple method for the introduction of low molecular weight reference compounds for the determination of retention indices or retention time comparison in Curie-point pyrolysis studies, 191
Characterization of bacteria by oxidative and non-oxidative pyrolysis–gas chromatography/ion trap mass spectrometry, 199
Characterization of bacteria by quartz tube pyrolysis–gas chromatography/ion trap mass spectrometry, 23
Compositional analysis of epoxy matrices of carbon fibre composites by pyrolysis–gas chromatography/mass spectrometry, 75
Molecular weight and pyrolysis products distribution of polymers. I. Polystyrene, 61
The potential of pyrolysis–gas chromatography/mass spectrometry in the recognition of ancient painting media, 227
Gas phase
Thermal dissociation of disilane: quadrupole mass spectrometry investigation, 51
GC/MS
Flash pyrolysis of coal sub-structures adsorbed on a carbosieve, 311
Pyrolysis–gas chromatography/mass spectrometry in the characterization of glycated albumin, 87

Hemicellulose
Thermal characterization analysis of milkweed floss, 147
Hydrocarbons
The indexing of monoglycerol diether lipids by flash pyrolysis–gas chromatography, 301

Ignition zone
Laser pyrolysis of explosives combined with mass spectral studies of the ignition zone, 163
Ion trap mass spectrometry
Characterization of bacteria by oxidative and non-oxidative pyrolysis–gas chromatography/ion trap mass spectrometry, 199
Characterization of bacteria by quartz tube pyrolysis–gas chromatography/ion trap mass spectrometry, 23
Isobenzofuran
Generation of isobenzofuran derivatives by pyrolysis–gas chromatography/mass spectrometry, 139

Kinetic study
Thermal behavior and mass spectrometry studies of 2-oxazolidinone derivatives, 291
Kinetics
Kinetics of triphenylisocyanurate pyrolysis, 179

Laser
Laser pyrolysis of explosives combined with mass spectral studies of the ignition zone, 163
Laser-induced decomposition
Chemical vapor deposition of polycarbosilane by laser-induced decomposition of silacyclohexane, 325
Lignin
Solid weight loss in the thermal decomposition of cellulose and pine sawdust, 257
Thermal characterization analysis of milkweed floss, 147
Lignin assays
Use of pyrolysis–gas chromatography/mass spectrometry in the study of lignin assays, 243
LPCVD
Thermal dissociation of disilane: quadrupole mass spectrometry investigation, 51

Maillard reaction
Pyrolysis–gas chromatography/mass spectrometry in the characterization of glycated albumin, 87
Mammalian cells
A pyrolysis–gas chromatographic/mass spectrometric method for measuring the DNA content of cultured mammalian cells, 107

Mass spectrometry
Compositional analysis of epoxy matrices of carbon fibre composites by pyrolysis–gas chromatography/mass spectrometry, 75
Laser pyrolysis of explosives combined with mass spectral studies of the ignition zone, 163
The potential of pyrolysis–gas chromatography/mass spectrometry in the recognition of ancient painting media, 227
Thermal behavior and mass spectrometry studies of 2-oxazolidinone derivatives, 291
Thermal dissociation of disilane: quadrupole mass spectrometry investigation, 51
Milkweed
Thermal characterization analysis of milkweed floss, 147
Monoglycerol diether lipids
The indexing of monoglycerol diether lipids by flash pyrolysis–gas chromatography, 301

Non-enzymatic glycation
Pyrolysis–gas chromatography/mass spectrometry in the characterization of glycated albumin, 87

Oil shale kerogens
Thermal decomposition behavior of oil shale kerogens observed by stepwise pyrolysis–gas chromatography, 273
2-Oxazolidinone derivatives
Thermal behavior and mass spectrometry studies of 2-oxazolidinone derivatives, 291

Phenylisocyanate
Kinetics of triphenylisocyanurate pyrolysis, 179
Pine sawdust
Solid weight loss in the thermal decomposition of cellulose and pine sawdust, 257
Plug-flow reactor
Kinetics of triphenylisocyanurate pyrolysis, 179
Polycarbosilane
Chemical vapor deposition of polycarbosilane by laser-induced decomposition of silacyclohexane, 325
Polystyrene
Molecular weight and pyrolysis products distribution of polymers. I. Polystyrene, 61
Py–GC/MS
A pyrolysis–gas chromatographic/mass spectrometric method for measuring the DNA content of cultured mammalian cells, 107
Generation of isobenzofuran derivatives by pyrolysis–gas chromatography/mass spectrometry, 139
Pyrolysis–gas chromatography/mass spectrometry of amino acids, 123
Use of pyrolysis–gas chromatography/mass spectrometry in the study of lignin assays, 243

Quartz tube pyrolysis
Characterization of bacteria by quartz tube pyrolysis–gas chromatography/ion trap mass spectrometry, 23

RDX
Laser pyrolysis of explosives combined with mass spectral studies of the ignition zone, 163
Retention index
A simple method for the introduction of low molecular weight reference compounds for the determination of retention indices or retention time comparison in Curie-point pyrolysis studies, 191

Silacyclohexane
Chemical vapor deposition of polycarbosilane by laser-induced decomposition of silacyclohexane, 325
Silicon thin films
Thermal dissociation of disilane: quadrupole mass spectrometry investigation, 51
Simultaneous pyrolysis–methylation
The potential of pyrolysis–gas chromatography/mass spectrometry in the recognition of ancient painting media, 227
Stepwise pyrolysis–gas chromatography
Thermal decomposition behavior of oil shale kerogens observed by stepwise pyrolysis–gas chromatography, 273

Tandem mass spectrometry
Identification of chemical biomarker compounds in bacteria and other biomaterials by pyrolysis–tandem mass spectrometry, 1
TG-trap-GC/MS
Thermal behavior and mass spectrometry studies of 2-oxazolidinone derivatives, 291
Thermal decomposition
A comparison of products from an air atmosphere tube furnace with a vacuum Curie-point pyrolyzer: implications for biodetection, 211
Solid weight loss in the thermal decomposition of cellulose and pine sawdust, 257
Thermal behavior and mass spectrometry studies of 2-oxazolidinone derivatives, 291
Thermal decomposition behavior of oil shale kerogens observed by stepwise pyrolysis–gas chromatography, 273

Thermal degradation
Pyrolysis–gas chromatography/mass spectrometry of amino acids, 123
Titanium carbonitride
Thermoanalytic studies of the pyrolysis of $CpTiCl_2N(SiMe_3)_2$ and its use as a precursor for the chemical vapor deposition of titanium carbonitride, 39
Triphenylisocyanurate
Kinetics of triphenylisocyanurate pyrolysis, 179

UNSCRAMBLER II-EX
Software review: UNSCRAMBLER II-EX, Version 3.42*, 197

Vacuum Curie-point pyrolyzer
A comparison of products from an air atmosphere tube furnace with a vacuum Curie-point pyrolyzer: implications for biodetection, 211

Xylan
Solid weight loss in the thermal decomposition of cellulose and pine sawdust, 257
